IMPORTANT NOTIFICATION

Priority date (day/month/year)

03/06/1998

Applicant

SMITHKLINE BEECHAM BIOLOGICALS S.A. et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

Item V.

- The BASB027 gene of SEQ ID NO:1 derives from genomic DNA sequences of the Moraxella catarrhalis strain ATCC 43617 (see Example 1, page 49 of the application). Since no technical feature distinguishes a "live microorganism comprising an isolated recombinant polynucleotide according to any one of claims 7-14" from the above mentioned naturally occurring strain, the subject-matter of present claim 15 lacks novelty under Article 33.2 PCT.
- II) A polypeptide <u>comprising</u> (see claims 1-3 and 6) an amino acid sequence according to the invention is a polypeptide which can also comprise <u>any other known sequence</u> (fusion proteins etc...; see claim 6).

 An antibody immunospecific for such a polypeptide (see claim 22) can be any known antibody immunospecific for said other known sequence. Thus, <u>claim 22</u> covers known antibodies and therefore lacks novelty under Article 33.2 PCT.
- III) The present application is based on the provision of nucleic acids (two variants) encoding the BASB027 polypeptides (two variants) from Moraxella catarrhalis. The claimed polypeptides and polynucleotides are neither disclosed nor rendered obvious by the prior art cited in the international search report.

 Thus, the claims not objected to for lack of novelty fulfil the requirements of Article 33.2 and 3 PCT.

CLAIMS:

- 1. An isolated polypeptide comprising an amino acid sequence which has at least 85% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2 and SEQ ID NO:4, over the entire length of SEQ ID NO:2 or SEQ ID NO:4 respectively.
- 2. An isolated polypeptide as claimed in claim 1 in which the amino acid sequence has at least 95% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2 and SEQ ID NO:4, over the entire length of SEQ ID NO:2 or SEQ ID NO:4 respectively.
- 3. The polypeptide as claimed in claim 1 comprising the amino acid sequence selected from the group consisting of: SEQ ID NO:2 and SEQ ID NO:4.
- 4. An isolated polypeptide having the amino acid sequence selected from the group consisting of SEQ ID NO:2 or SEQ ID NO:4.
 - 5. An immunogenic fragment of the polypeptide as claimed in any one of claims 1 to 4 in which the immunogenic fragment is capable of raising an immune response (if necessary when coupled to a carrier) which recognises the polypeptide of SEQ ID NO:2 or SEQ ID NO:4.
 - 6. A polypeptide as claimed in any of claims 1 to 5 wherein said polypeptide is part of a larger fusion protein.
 - 7. An isolated polynucleotide encoding a polypeptide as claimed in any of claims 1 to 6.
- 8. An isolated polynucleotide comprising a nucleotide sequence encoding a polypeptide that has at least 85% identity to the amino acid sequence of SEQ ID NO:2 or 4 over the entire length of SEQ ID NO:2 or 4 respectively; or a nucleotide sequence complementary to said isolated polynucleotide.

5

15

30

YUN FELA MURNCHEN UI

- 9. An isolated polynucleotide comprising a nucleotide sequence that has at least 85% identity to a nucleotide sequence encoding a polypeptide of SEQ ID NO:2 or 4 over the entire coding region; or a nucleotide sequence complementary to said isolated polynucleotide.
- 10. An isolated polynucleotide which comprises a nucleotide sequence which has at least 85% identity to that of SEQ ID NO:1 or 3 over the entire length of SEQ ID NO:1 or 3 respectively; or a nucleotide sequence complementary to said isolated polynucleotide.
- 11. The isolated polynucleotide as claimed in any one of claims 7 to 10 in which the 10 identity is at least 95% to SEQ ID NO:1 or 3.
 - 12. An isolated polynucleotide comprising a nucleotide sequence encoding the polyneptide of SEQ ID NO:2 or SEQ ID NO:4.
 - 13. An isolated polynucleotide comprising the polynucleotide of SEQ ID NO:1 or SEQ ID NO:3.
- 14. An isolated polynucleotide comprising a nucleotide sequence encoding the polypeptide of SEQ ID NO:2, SEQ ID NO:4 obtainable by screening an appropriate library under 20 stringent hybridization conditions with a labeled probe having the sequence of SEQ ID NO:1 or SEQ ID NO:3 or a fragment thereof.
- 15. An expression vector or a live microorganism comprising an isolated recombinant polynucleotide according to any one of claims 7 - 14. 25
 - 16. A host cell comprising the expression vector of claim 15 expressing an isolated polypeptide comprising an amino acid sequence that has at least 85% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2 and SEQ ID NO:4, or a membrane of the host cell comprising the expressed polypeptide.

BM45324

- 17. A process for producing a polypeptide of claims 1 to 6 comprising culturing a host cell of claim 16 under conditions sufficient for the production of said polypeptide and recovering the polypeptide from the culture medium.
- 18. A process for expressing a polynucleotide of any one of claims 7 14 comprising transforming a host cell with the expression vector comprising at least one of said polynucleotides and culturing said host cell under conditions sufficient for expression of any one of said polynucleotides.
- 19. A vaccine composition comprising an effective amount of the polypeptide of any one of claims 1 to 6 and a pharmaceutically acceptable carrier.
 - 20. A vaccine composition comprising an effective amount of the polynucleotide of any one of claims 7 to 14 and a pharmaceutically effective carrier.
 - 21. The vaccine composition according to either one of claims 19 or 20 wherein said composition comprises at least one other Netsseria meningitidis antigen.
- 22. An antibody immunospecific for the polypeptide or immunological fragment as claimed in any one of claims 1 to 6.
 - 23. A method of diagnosing a Neisseria meningitidis infection, comprising identifying a polypeptide as claimed in any one of claims 1 6, or an antibody that is immunospecific for said polypeptide, present within a biological sample from an animal suspected of having such an infection.
 - 24. Use of a composition comprising an immunologically effective amount of a polypeptide as claimed in any one of claims 1 6 in the preparation of a medicament for use in generating an immune response in an animal.

25

15

01-08-2000

BM45324

- 25. Use of a composition comprising an immunologically effective amount of a polynucleotide as claimed in any one of claims 7 - 14 in the preparation of a medicament for use in generating an immune response in an animal.
- 26. A therapeutic composition useful in treating humans with Neisseria meningitidis 5 comprising at least one antibody directed against the polypeptide of claims 1-6 and a suitable pharmaceutical carrier.

van de Kamp, M

Authorized officer

CLAIMS:

- 1. An isolated polypeptide comprising an amino acid sequence which has at least 85% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2, SEQ ID NO:4.
- 2. An isolated polypeptide as claimed in claim 1 in which the amino acid sequence has at least 95% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2, SEQ ID NO:4.
- 3. The polypeptide as claimed in claim 1 comprising the amino acid sequence selected from the group consisting of: SEQ ID NO:2, SEQ ID NO:4.
- 4. An isolated polypeptide of SEQ ID NO:2 or SEQ ID NO:4.
- 5. An immunogenic fragment of the polypeptide as claimed in any one of claims 1 to 4 in which the immunogenic activity of said immunogenic fragment is substantially the same as the polypeptide of SEQ ID NO:2, SEQ ID NO:4.
- 6. An isolated polynucleotide comprising a nucleotide sequence encoding a polypeptide that has at least 85% identity to the amino acid sequence of SEQ ID NO:2, 4 over the entire length of SEQ ID NO:2, 4 respectively; or a nucleotide sequence complementary to said isolated polynucleotide.
- 7. An isolated polynucleotide comprising a nucleotide sequence that has at least 85% identity to a nucleotide sequence encoding a polypeptide of SEQ ID NO:2, 4 over the entire coding region; or a nucleotide sequence complementary to said isolated polynucleotide.

WO 99/63093 PCT/EP99/03822

8. An isolated polynucleotide which comprises a nucleotide sequence which has at least 85% identity to that of SEQ ID NO:1, 3 over the entire length of SEQ ID NO:1, 3 respectively; or a nucleotide sequence complementary to said isolated polynucleotide.

- 9. The isolated polynucleotide as claimed in any one of claims 6 to 8 in which the identity is at least 95% to SEQ ID NO:1, 3.
- 10. An isolated polynucleotide comprising a nucleotide sequence encoding the polypeptide of SEQ ID NO:2, SEQ ID NO:4.
- 11. An isolated polynucleotide comprising the polynucleotide of SEQ ID NO:1, SEQ ID NO:3.
- 12. An isolated polynucleotide comprising a nucleotide sequence encoding the polypeptide of SEQ ID NO:2, SEQ ID NO:4 obtainable by screening an appropriate library under stringent hybridization conditions with a labeled probe having the sequence of SEQ ID NO:1, SEQ ID NO:3 or a fragment thereof.
- 13. An expression vector or a recombinant live microorganism comprising an isolated polynucleotide according to any one of claims 6 12.
- 14. A host cell comprising the expression vector of claim 13 or a subcellular fraction or a membrane of said host cell expressing an isolated polypeptide comprising an amino acid sequence that has at least 85% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2, SEQ ID NO:4.
- 15. A process for producing a polypeptide comprising an amino acid sequence that has at least 85% identity to the amino acid sequence selected from the group consisting of: SEQ ID NO:2, SEQ ID NO:4 comprising culturing a host cell of claim 14 under conditions

WO 99/63093 PCT/EP99/03822

sufficient for the production of said polypeptide and recovering the polypeptide from the culture medium.

- 16. A process for expressing a polynucleotide of any one of claims 6 12 comprising transforming a host cell with the expression vector comprising at least one of said polynucleotides and culturing said host cell under conditions sufficient for expression of any one of said polynucleotides.
- 17. A vaccine composition comprising an effective amount of the polypeptide of any one of claims 1 to 5 and a pharmaceutically acceptable carrier.
- 18. A vaccine composition comprising an effective amount of the polynucleotide of any one of claims 6 to 12 and a pharmaceutically effective carrier.
- 19. The vaccine composition according to either one of claims 17 or 18 wherein said composition comprises at least one other *Moraxella catarrhalis* antigen.
- 20. An antibody immunospecific for the polypeptide or immunological fragment as claimed in any one of claims 1 to 5.
- 21. A method of diagnosing a *Moraxella catarrhalis* infection, comprising identifying a polypeptide as claimed in any one of claims 1 5, or an antibody that is immunospecific for said polypeptide, present within a biological sample from an animal suspected of having such an infection.
- 22. Use of a composition comprising an immunologically effective amount of a polypeptide as claimed in any one of claims 1-5 in the preparation of a medicament for use in generating an immune response in an animal.

WO 99/63093 PCT/EP99/03822

23. Use of a composition comprising an immunologically effective amount of a polynucleotide as claimed in any one of claims 6 - 12 in the preparation of a medicament for use in generating an immune response in an animal.

24. A therapeutic composition useful in treating humans with *Moraxella catarrhalis* disease comprising at least one antibody directed against the polypeptide of claims 1-5 and a suitable pharmaceutical carrier.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference See Notification of Transmittal of International FOR FURTHER ACTION Preliminary Examination Report (Form PCT/IPEA/416) FB/sh/bm45324 Priority date (day/month/year) International application No. International filing date (day/month/year) 31/05/1999 03/06/1998 PCT/EP99/03822 International Patent Classification (IPC) or national classification and IPC C12N15/31 **Applicant** SMITHKLINE BEECHAM BIOLOGICALS S.A. et al. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of 4 sheets, including this cover sheet. This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT). These annexes consist of a total of 4 sheets. 3. This report contains indications relating to the following items: Basis of the report ☐ Priority Non-establishment of opinion with regard to novelty, inventive step and industrial applicability Ш Lack of unity of invention Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations suporting such statement VΙ ☐ Certain documents cited ☐ Certain defects in the international application VII ☐ Certain observations on the international application VIII Date of completion of this report Date of submission of the demand 1 9. 09. 00 06/12/1999 **Authorized officer** Name and mailing address of the international preliminary examining authority: **European Patent Office**

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP99/03822

I. Basis of the report

1. This report has been drawn on the basis of (substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.): **Description, pages:** as originally filed 1-66 Claims, No.: 01/08/2000 with letter of 31/07/2000 1-26 as received on Drawings, sheets: as originally filed 1/26-26/26 2. The amendments have resulted in the cancellation of: ☐ the description, pages: ☐ the claims, Nos.: sheets: ☐ the drawings, 3. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

see separate sheet

Item V.

- The BASB027 gene of SEQ ID NO:1 derives from genomic DNA sequences of the Moraxella catarrhalis strain ATCC 43617 (see Example 1, page 49 of the application). Since no technical feature distinguishes a "live microorganism comprising an isolated recombinant polynucleotide according to any one of claims 7-14" from the above mentioned naturally occurring strain, the subject-matter of present claim 15 lacks novelty under Article 33.2 PCT.
- II) A polypeptide <u>comprising</u> (see claims 1-3 and 6) an amino acid sequence according to the invention is a polypeptide which can also comprise <u>any other known sequence</u> (fusion proteins etc...; see claim 6).
 An antibody immunospecific for such a polypeptide (see claim 22) can be any known antibody immunospecific for said other known sequence. Thus, <u>claim 22</u> covers known antibodies and therefore lacks novelty under Article 33.2 PCT.
- III) The present application is based on the provision of nucleic acids (two variants) encoding the BASB027 polypeptides (two variants) from Moraxella catarrhalis. The claimed polypeptides and polynucleotides are neither disclosed nor rendered obvious by the prior art cited in the international search report. Thus, the claims not objected to for lack of novelty fulfil the requirements of Article 33.2 and 3 PCT.
